

Configurer ActiveSync/Outlook Mobile Access sur votre mobile

- ▶ Pour configurer ActiveSync ou Outlook Mobile Access sur votre mobile, procéder comme suit :
 - Dans le panneau de configuration (<https://vtxhex.ch/controlpanel>), saisir les données d'utilisateur.

The screenshot shows a web browser window displaying the VTX login page. The page has a light gray background. In the top left corner, there is the VTX logo and the text 'YOUR TELECOM PARTNER'. In the top right corner, there is a red home icon followed by the text 'Hosted Exchange Control Panel'. The main content area is a white box with a blue header that says 'Login bei VTX'. Inside this box, there are three input fields: 'Benutzername:' with a text input, 'Passwort:' with a password input, and 'Sprache:' with a dropdown menu showing 'English'. A 'Login' button is located at the bottom right of the input fields. Below the login box, there is a small copyright notice: 'Copyright © 1999-2010 Parallels. All rights reserved'.

- ▶ Cliquez sous la rubrique « Exchange » à gauche de l'écran sur « boîtes aux lettres » pour accéder à la vue d'ensemble de toutes les boîtes aux lettres activées et sélectionnez la boîte aux lettres à paramétrer.

How to configure ActiveSync on Windows Mobile 2003, 5.0, 6.0 Smartphones and Pocket PC

1. Please ensure that you have a cellular data plan to use the service.
2. Turn on the device and enter the PIN.
3. On the Home screen click **Start** > **Internet Explorer**.
4. Enter the URL <https://vbxhex.ch/mobile.html> in the **Address Bar** and click **Go**.
5. Enter your mailbox login `paperlapap@vbxhex.test` and password, and click **Download Profile**.
6. At the Download dialog box click **Yes** for file **profile.cab** downloading. Be sure that **Open file after download** button is checked.
7. The **Unknown Publisher** dialog box may appear. Click **Yes** to continue with the installation. Notification of a successful installation will appear.

For checking synchronization with Exchange server, in the **ActiveSync** panel click **Sync**.

How to configure RoadSync 2.0 on Symbian Smartphones.

1. Click the **RoadSync** icon to walk through setting up RoadSync.
2. Click **Next**.
3. Enter the following information:
User name: Type your Windows user name `paperlapap`.
Password: Type your mailbox password.
Server Name: Enter name of the ActiveSync server `mail.business-exchange.ch`.
Domain: Type NetBIOS name of Windows domain `HOSTING`.
4. **Use SSL** is enabled by default. To disable this feature, uncheck the box.
5. Once your settings are entered click **Verify Settings** to ensure that you can successfully connect to the Exchange Server.
6. A message will appear asking to allow access to your data network. Click **Always Allow**.
7. You will be prompted to **select an Access Point** to establish an appropriate network connection. Click **Connect**.
8. The next screen recommends turning off Calendar, Contacts, and E-mail portions of PC Suite while using RoadSync. This is to avoid duplication. Click **Next**.
9. Choose how you would like to synchronize your data. Then click **Next**.
 - o Outlook overwrites phone (recommended) - Contacts and Calendar information will be removed on the phone and your Outlook data will be brought down to the phone.
 - o Merge data - Contacts and Calendar information on your phone will be merged with your Outlook data. This may cause duplicates.
10. A warning that RoadSync will remove your handheld data or merge your data will appear, depending on your choice above. Click **Yes**.
11. Finished.

At this time, you are ready for your first sync. Select **Sync**. You will see the progress of the sync as it connects, checks for new data, downloads new data, and updates the data on your wireless device. When the sync is complete, you will see a message that says "**Direct Push Active**" or "**Last Sync**" with the current date and time.
12. How to configure Always Up-To-Date Notification (AUTD) on Symbian Smartphones

You can have RoadSync automatically push information to and from your phone or synchronize at a defined time interval. By default, push is enabled. To take advantage of push or sync scheduling, please complete these steps on your wireless phone.
 1. Open RoadSync.
 2. Tap the drop-down menu and choose **Settings**.
 3. Select the **Sched.** tab.
 4. **Enable Push** or disable push to use **Scheduled Sync**.
 5. If you are using **Scheduled Sync** select a time interval and data to sync from the list provided.
 6. Tap **OK**.
Push and Scheduled Sync will continue as long as the phone is turned on. It will remain enabled after turning the phone off and then turning it on again. If the phone is in use during a push or scheduled sync, the sync will be skipped and attempted again at a later time.

► Remarque sur la configuration d'ActiveSync (Points 6 et 7) :

au cas où le fichier `profile.dat` ne peut être installé sur votre mobile, vous pouvez établir la connexion sur votre mobile manuellement. Vous aurez besoin des informations suivantes :

- E-mail : adresse E-mail complète
- Serveur : `mail.business-exchange.ch`
- Nom de domaine : laisser vide
- SSL : oui
- Nom d'utilisateur : adresse E-mail (sans `@votrenomdedomaine.ch`)
- Mot de passe : votre mot de passe Hosted Exchange 2007

► Terminez l'installation en suivant les instructions sur votre mobile.
